

Update Pattern

Using Update Pattern

```
1 var update = function(newdata) {  
2   // only the update selection  
3   bars.data(newdata)  
4     .attr({"x": x(d.x)});  
5   // the enter and update selection  
6   bars.data(newdata)  
7     .enter()  
8     .append("rect")  
9     .attr({"y": height-y(d.y), "height": y(d.y),  
10      "width": 10})  
10    .merge()  
11    .attr({"x": x(d.x)});  
12 }
```
