

Reducing Complexity

Data Cube

Network Graph

PivotGraph (Wattenberg)

Edge Bundling

Holten & van Wijk, 2009

unbundled

**force-directed
edge bundling**

Holten, D., & Van Wijk, J. J. (2009). Force-directed edge bundling for graph visualization. In *Computer Graphics Forum* (Vol. 28, No. 3, pp. 983-990).

Filtering, Subsetting, Binning

Techniques often necessary for static vis
and complement interactive/exploratory vis

Combine with network statistics (attributes)

Statistical pitfalls for subsetting on networks
(caution)

Sampling Strategies

Random node selection

Random edge selection

Crawling (random walks)

Goals

Statistically represent subgraph

Re-estimation of network parameters,
node/edge attributes

Vis!
