

# Perception of Color

---

Image source: Ware, C. (2012). *Information visualization: perception for design*. Elsevier.

# Uses of Color

---

- Label
- Measure
- Represent/imitate reality
- Enliven/decorate

(Tufte, 1990)

# Color Models

# Terminology

---

- **Hue**   
Dominant wavelength, named color
- **Saturation**   
Intensity or purity of color  
Distance from gray/white/black
- **Lightness**   
Light to dark

# Culture and Emotion

# Color Harmony

---

- Difficult to study
- Conflicting results
- Confounding of preference and harmony

# Individual Colors

---

Yellow < orange < purple < green < red < blue  
(Eysenck, 1941)

Color preference based on affective response to objects of that color. (Palmer & Schloss, 2010)

Pairing of colors to emotions is consistent.  
Hue is not the main influence on emotion;  
saturation is. (D'Andrade & Egan, 1974; Kieffer, 1974; Johnson, Johnson, & Baksh, 1986)

# Emotional Responses

---

- Blue, green, white: peaceful, gentle, calming (beautiful, pleasant in some countries)
- Black, brown: sad, stale (formal, masculine in some countries)
- Gold, orange, yellow: no strong associations
- Purple: similar to brown for Asian countries
- Red: active, hot, vibrant, emotional, sharp (pleasant in PRC and Taiwan)

(Madden, Hewett, & Roth, 2000)
