

Multiple Views

Why use multiple views?

- Data diversity (attributes, models, etc.)
- Want to find correlations or disparities
- Improve user performance when one view overwhelms

[Wang Baldonado et al., 2000]

Diversity of data

Diverse Attributes

- Attributes (e.g., dates traveled, histogram of countries visited)
- Subsets or aggregate views shown simultaneously

Level of Abstraction

- Layers of detail (e.g., entire city vs. detail of streets)

Similar View Placement

- Examined context switching
 - Dual-view similar charts made for poor pattern search
- [Convertino et al, 2003]

Convertino et al., 2003. Exploring context switching and cognition in dual-view coordinated visualizations. In *Coordinated and Multiple Views in Exploratory Visualization*, 2003. Proceedings. International Conference on (pp. 55-62). IEEE.

Small Multiple Placement

- Correlated small multiple views perform well for visual search & comparison

[Liu et al., 2015]
